## Abstract

Provide an abstract for your article. Abstract should be no longer than 250 words and contain only text (no citation, hyperlinks or images) and without new lines.

## Keywords

*Keywords, (max 5), must, be, separated, by, the, comma*

## 1. Section's title

- Use only sections and subsections.
- Keep your bibliography in the Biblatex format in the bibliography `\bibliography.bib` file [1, 2].
- Images and tables can be included using `figure` and `table` environment. If you would like to have an image across whole page, use the appropriate environment with star i.e.: `figure*`. If your image or figure should be wider than a text's width do not remove `\colorbox{white}` and curly braces around `\includegraphics{}` or `\begin{tabular}{}` to keep vertical blue line underneath the floats.

Figure 4. Very long figure's caption, Very long figure's caption, Very long figure's caption, Very long figure's caption, Very long figure's caption, Very long figure's caption.

Table 1. A simple table. Use horizontal lines to distinguish header and end of the table only. Do not use vertical lines.

Column 1	Column 2	Column 3
1	2	3
4	5	6
7	8	9

### 1.1. First subsection

Do not use lower levels of sections like subsection and so on. If you would like to quote some text, do it using `blockquote`. It can be "in text

“Some very long text to quote. Probably more than a sentence [3]”

You can also add mathematical formulas. An inline formula is written within the text, such as  $E = mc^2$ . Displayed formulas are separated from the text and centered. If you want numbered formula use equation environment. For formulas without number please use `displaymath`

$$\int_a^b f(x) dx = F(b) - F(a) \tag{1}$$

$$\sqrt{x^2 + 1} = y$$
